### **DETAILED ACTION**

This is a Notice of Allowance for application no. 09/866,151 in response to the RCE filed on September 19, 2006 wherein claims 16-37 are presented for examination.

### **EXAMINER'S AMENDMENT**

The application has been amended as follows:

An amendment to the Abstracted has been made. Replace the beginning lines of the Abstract:

""The object of the present invention is to provide a position detection apparatus that is able to easily detect self-position during autonomous movement by a humanoid robot that moves by the use of legs or automobile.

The present invention discloses a position detection apparatus that detects the"" with the following amendment:

--A position detection apparatus that is able to easily detect self-position during autonomous movement by a humanoid robot that moves by the use of legs or automobile. The position detection apparatus detects the--.

### ***Allowable Subject Matter***

Claims 16-37 allowed.

After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 16-37 are found to be in condition for allowance.

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose an apparatus, method and program for detecting a position of a moving robot as claimed.

The closest prior art (US Patent 5,525,882 to Asaka et al.) teaches a method and system for maneuvering a mobile robot. However, Asaka fails to particularly teach or suggest the specific local image acquisition, distance image acquisition, characteristic point extraction, and reference characteristic point selection as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Rekstad whose telephone number is 571-272-7338. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on 571-272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
